C² CPT

Career Pathing Tool

It's not just a path, it's a step in the right direction

The C² Career Pathing Tool (CPT) organizes and structures career information, providing employees with resources and guidance to manage their careers.

System Features

- Cloud-based Service (SaaS)
- Custom Branding
- AI-powered
- Multi-platform/Responsive Design
- Section 508 Compliant
- FedRAMP-certified Cloud Hosting

Our software provides employees with tools to build meaningful career paths based on their aspirations and interests, review skill gaps against future jobs, and engage in relevant learning experiences to prepare for their next role.

Guide your talent along the path to success

- Demonstrate career opportunities to current and prospective employees
- Align employee development efforts with organizational needs
- Promote engagement and enhance retention
- Align and strengthen your talent pipeline
- Foster transparency and consistency

Help employees take their career in new directions

- Break silos and encourage cross-development
- Identify typical paths of progression within an organization
- Identify crossover between functional areas
- Encourage proactive career planning and development

Create individualized Career Path Plans

- Select paths that best align to goals
- Create, print, and save individualized career plans and guidance
- Assess competency strengths and identify areas for improvement
- Focus and accelerate growth to reach goals faster and more efficiently
- Pursue selected paths in an informed manner
