Solution Guidance Corporation (SGC) was established as a woman-owned small business in 2002 to provide program management system solutions to commercial Architecture, Engineering, and Construction (AEC) companies. In 2006 SGC won a contract to provide the U.S. Postal Service (USPS) with program management technology and services including cloud deployment of the application. Thus began our foray with the Federal Government. Since then SGC has had successful engagements with the General Services Administration (GSA), Department of Homeland Security (DHS), Architect of the Capitol (AOC), Department of Defense (DoD), and the U.S. Agency for International Development (USAID).
